

Child Care Administration

LEARNING OBJECTIVES

Our child care administration program is designed by early childhood education (ECE) experts and experienced industry professionals. It goes above and beyond certification requirements to ensure your competence (and confidence) from day one on the job as a shiny new child care administrator.

You'll gain the skills and knowledge needed for teaching young children, working in child care centers and preschools, and running your own home-based business. Our comprehensive program trains you on child development and education, health and safety, nutrition and food management, parent and family relations, and child care center management. And because our program is aligned with the Child Development Associate (CDA) certification, you'll be ready to take—and pass—the exam as soon as you finish your training.

All you need is a high school diploma or a GED to get started.

Program Orientation: Child Care Administration

- Initiate Child Care Administration Program.

Computer Fundamentals

- Gain a solid foundation of digital technology knowledge and skills that can be applied in everyday life as well as in any career or profession.
