Health IT Security Manager

LEARNING OBJECTIVES

Cybersecurity is a serious business. And protecting data is a top priority for healthcare providers. If you already know the basics of what it takes to keep the bad guys (hapless hackers, slimy cybercriminals, and vicious viruses) out, then this program is the perfect complement to your current skill set!

Certified HIPAA Security Professional

- Learn what it takes to protect health information from breaches and other digital threats.

Certified Medical Practice Security Professional

- Encryption techniques, Cybersecurity best practices, and prevention principles—this is your overview of healthcare site security management.

Certified PCI-DSS Security Compliance Healthcare Professional

- This is where you'll learn how to protect patients' cold, hard cash (and protect your workplace, too).

Certified Healthcare Cybersecurity Professional

- Open your eyes to the methods and tactics used by hackers—and the critical role Cybersecurity plays in keeping medical information secure.

Certificate of Healthcare Leadership Proficiency

- Develop the know-how to build a strong, functioning team that gels.

Final Exam

- Test your knowledge.
