

Behavioral & Psychiatric Health Technician

LEARNING OBJECTIVES

Our 380-hour Behavioral Health and Psychiatric Technician program is divided into 15 courses, which cover a number of topics, including HIPAA standards, pharmacology basics, career-readiness skills, and patient education.

Program Orientation

- Initiate the Behavioral Health and Psychiatric Technician program.

Pharmacology Basics

- Identify the classifications of drugs.
- Review indications, side effects, and adverse reactions of various classifications of drugs.
- Interpret accepted abbreviations used in reference to medications.
- Explain how to use drug reference guides.
- Describe the rights of proper drug administration.
- Describe the routes of administration for medication.
- Explain how to prepare and administer the most common types of medications.
- Identify the four steps of pharmacokinetics.
- Explore the guidelines for sending orders for prescriptions.
- Calculate correct dosage of medication for administration.
- Convert between household and metric systems of measurement.
- Identify commonly used abbreviations in medical dosage calculation.

Infection Control

- Review the causes and diagnostic methods of various infectious and communicable diseases.
- Explore the protective measures required to prevent infection.
- Outline the treatments and protective measures required to manage and control the spread of infectious disease.
- Identify procedures and protocols for responding to infection control.

Testing and Laboratory Procedures

- Identify how specimens are collected and handled.
- Explore procedures and processes used in

obtaining blood and urine samples.

- Outline the standard components of vision and hearing screening tests.
- Review common techniques and processes frequently used in medical laboratories

Patient Care Coordinator and Education

- Review how to administer and coordinate general patient care according to professional best practices.
- Explore the role and responsibilities in administering patient care.
- Explore the role and responsibilities in facilitating patient education.
- Summarize basic communication best practices and potential barriers to effective communication with patients.

Medical Administrative Assistant

- Describe the differences between common healthcare delivery models.
- Describe the types of services typically offered in medical offices, including general and specialty services.
- Define ancillary services and alternative therapies.

Communication and Customer Service

- Identify the various types and styles of communication used in a healthcare office.
- Review how verbal, non-verbal, and written communication skills contribute to patient experience and outcome in a healthcare office.
- Identify professional communication techniques for a healthcare office, including interviewing techniques and use of medical terminology and patient-accessible language.
- Explore modified communication for patients with special considerations.
- Outline protocols for providing customer service for a healthcare office.

Behavioral & Psychiatric Health Technician

LEARNING OBJECTIVES

Electronic Medical Records

- Explain the importance of clinical standards in the development of interoperable electronic health records.
- Demonstrate an understanding of how electronic health records are used in physician practices and other outpatient settings.
- Demonstrate an understanding of how electronic health records are used in hospitals.

Medical Laws and Ethics

- Describe the structure of the healthcare industry and how it relates to the medical office profession.
- Identify law and regulations related to the healthcare workplace.
- Describe how law flows from the constitution to the courtroom.
- Identify criminal acts and intentional torts.
- Recognize what makes a contract and who can contract.
- Identify medical malpractice and other lawsuits.
- Explain the characteristics, ownership, and confidentiality of the health record.
