

Healthcare IT Professional

INDUSTRY FACTS

What do healthcare information technicians do?

What is health information technology, exactly, and what does a health information technician do? Well, from a bird's-eye view, health information technology is the secure management of health information across computerized systems, and health information technicians work behind the scenes in healthcare facilities to improve patient care through tech.

Here's a breakdown of their responsibilities:

- Obtaining, processing, and recording healthcare data.
- Ensuring information quality and security.
- Installing and administering basic computer systems and networks.
- Determining hardware and interface problems and providing support.

Where do they work?

Healthcare information technicians work in a variety of healthcare facilities such as hospitals, physicians' offices, home healthcare agencies, nursing homes, public health offices, and insurance companies.

How much do they earn?

Pay rates vary depending on geographic location and experience, and HIT professionals often qualify for traditional employment benefits. The Department of Labor reports that the average salary is around \$57,910 per year.*

How's the job outlook?

Healthcare and technology are two of the fastest growing industries in the United States, and technology is becoming increasingly important in providing quality patient care. The following estimates from the Department of Labor provide insights into the growing industry:

- As the fastest growing job sector, the healthcare industry is expected to add over 2.3 million new jobs by 2026.
- Government-mandated implementation of electronic health records is putting healthcare information technicians in high demand.

"I have been going through CareerStep for two years and have never worked with such amazing people. Anytime I need help, they are always there—and I am so thankful for that!"

PROGRAM DETAILS

Improve Your Life

When it comes to career training, you'll find a lot of posers out there. Con artists that'll try to impress you with fancy hyperbole. But through all the noise, the distinct sound of success can be heard. Your success. All it takes is a little push. A nudge in the right direction—and your whole life could change. New doors opened. New worlds discovered. New opportunities explored. With CareerStep, it all could happen in as little as 4 months.

Prepare For A Better Job

Train affordably without sacrificing quality. This program's comprehensive training was developed by industry professionals with years of experience – specifically designed to help you prepare for the CompTIA A+ exams.

Learn Your Way (From Home)

With online training, you can absorb more knowledge and learn more skills—fast.

- Study on a schedule that fits your life
- Progress at a pace that matches your learning style
- Adjust the time and effort you devote to your coursework each day

Receive Coaching and Guidance

When you train with CareerStep, we back you every step of the way—from enrollment through course completion.

- Learner support
- Technical support
- Career support

Get Certified

We'll prepare you to take nationally recognized exams so you can explore greater opportunities in your area.

- **CompTIA: A+**

Program Modules and Approximate Completion Hours

Module	Hours
Program Orientation: Healthcare IT Professional	1
Computer Fundamentals	7
Introduction to Healthcare Information Technology	49
Health Information Management	31
Coding Basics	11
Telehealth for Clinical Support	4
Microsoft Office 2019: Foundations Course	23
A+ Core 1	86
A+ Core 2	70
Principles of Information Security	84
Service Desk Professional	58
Computer User Support	91
Program Completion: Healthcare IT Professional	2
TOTAL	517
