

Patient-Centered Medical Home (PCMH)

LEARNING OBJECTIVES

Healthcare is always evolving (kind of like you). And as the industry shifts from traditional methods of service toward a more patient-oriented form of care, organizations are looking for modern patient-management strategies that are affordable and easy to implement.

There's plenty of options out in the wild, but Patient-Centered Medical Home models are leading the charge, transforming the way providers diagnose, treat, and communicate with patients.

CareerStep's PCMH course is designed for practice managers, consultants, medical staff, and students in healthcare programs — and provides an in-depth overview of how a PCMH model works.

This course is fully accredited for continuing education, CE / CME and credential renewal for Physicians / PAs, Nurses / RNs / LPNs, CHCIOs, CAHIMs and CPHIMs managers.

The Goals of the Patient-Centered Medical Home Model

- Discuss best practices, cost structures, and industry recommendations for successful PCMH models and systems.

The History of PCMH Development

- Get a complete rundown of when and where PCMH started and how it has transformed the industry.

Positive Outcomes of PCMH Models

- Review the five basic principles of PCMH and discuss how these philosophies lead to better care.

How are PCMH Models Successful

- Discuss what makes PCMH models so valuable as healthcare continues to evolve.

Beginning the Transition to a Patient-Centered Medical Home

- Find out how to make the shift from a traditional medical provider to a successful PCMH.

PCMH Recognition Process

- Learn how to qualify for PCMH recognition

Course Exam

- Test your knowledge.
